

WE ARE STARS  
©2007 The Dupont Angels

We blasted off at 4:00  
On Friday afternoon,  
Flew like rocket ships,  
Through skies of navy blue.  
Passed the Milky Way,  
And the Big Dipper too;  
Watched the earth below,  
And landed on the moon!

WE ARE STARS. We twinkle and shine.  
WE ARE STARS, That light up the night.  
We all shine together though we're miles apart  
WE ARE STARS. WE ARE STARS!

The moon was hard as rock,  
And cold as winter snow.  
So we sparkled hard,  
And made our bodies glow.  
We fired up our jets,  
And zoomed across the sky;  
Heard a special wish,  
Then quickly winked "Goodbye."
